

PRESS RELEASE: CCEC announces 2nd annual ranking of Canada's fastest growing Chambers of Commerce

June 4, 2026 (Chester, NS) – The Chamber of Commerce Executives of Canada (CCEC) is proud to announce the release of its second annual ranking of Canada's fastest growing Chambers, celebrating the remarkable success, resilience, and growing impact of Chambers of Commerce across the country.

The ranking, organized across four categories based on membership size, is part of CCEC's annual research on membership trends. 156 Chambers of Commerce and Boards of Trade from across Canada completed the survey, which found that membership growth remains strong across the Chamber Network - 67.3% of participating Chambers reported an increase in membership, with a national average membership retention rate of 88.8%.

"Congratulations to the Chambers leading the way in membership growth across Canada," said Acacia Pangilinan, President of CCEC and Executive Director of both the Kamloops & District Chamber of Commerce, and the Merritt & District Chamber of Commerce. "As Chambers grow, they bring more Canadians together to strengthen local economies and create better conditions for business success. Our ranking celebrates the leadership, innovation and commitment driving Chambers across Canada."
